

Models/Materials	Transgenic animals	Rhes mice, C-Rel mice
	Cell lines	
	Other	in vivo model of neurodegeneration
Protocols and Methods	Cell culture	
	Biochemistry	
	Gene expression	
	Immunohistochemistry	GFAP, CD-11b, tyrosine hydrosylase
	Molecular Biology	In situ hibridization
	Receptor binding	
	Western blotting	
	Electrophysiology	
	Behaviour	motor, cognitive, abuse potential
	Other	
Non commercial antibodies	P1 receptors	
	P2 receptors	
Non commercial drugs		
Fluorescent probes		
Investigational diagnostic test		
Biosamples	Human origin	
	Animal origin
